technical information 35

"In summer my dogs and I cross hundreds of rivers, confront bears and deal with wolf packs. Wildlife here tends to eat what it pleases, including human beings.

In perpetual polar winters it's cold enough to spit ice cubes. Brutal cold has a tendency to kill. In a tent I want sleep. I want insulation. I want warmth. I am demanding and use only gear that tolerates the torture I inflict upon it. Multimats do all this."

Gary Rolfe
